Relative Date Filter Reference

Relative date filters let you filter on date fields using easy-to-understand, human-speech-inspired syntax.

For example, instead of filtering on `Close Date greater than Jan 1, 2017`, filter using a relative date: `Close Date equals this year`.

For Enterprise, Unlimited, Performance, Professional, and Developer Editions, the week is defined by the Locale dropdown list on your personal information page. For Contact Manager, Group, and Personal Editions, the week is defined by the Locale setting in the company profile. For example, when the locale is US English, a week runs Sunday to Saturday, whereas with UK English, a week spans Monday to Sunday.

Capitalization doesn't matter in relative date filter operators. `THIS YEAR` works, as do `This Year` and `this year`.

NOTE Standard filters and custom field filters interpret relative date filters that begin with `NEXT n DAYS` - differently. Standard date filters return records that are time-stamped on the day that the report is run continuing for `n` days. Custom field filters return records time-stamped on the day after the day the report is run continuing for `n` days.

For example, say that your opportunity report's standard date filter is `CLOSE DATE equals NEXT 5 DAYS` and you run it on October 24. The report returns opportunities that close sometime between October 24 through October 28.

Say that your opportunity report has a custom field filter (instead of a standard date filter) for `CLOSE DATE equals NEXT 5 DAYS` and you run it on October 24. The report returns opportunities that close sometime between October 25 through October 29.
