

How to scan QR Codes with your iPhone or Android Mobile Device

DSO-PV Handout - 2018 DTRAIN

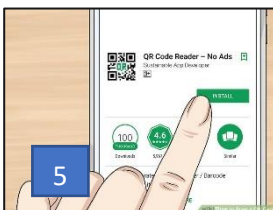

On your iPhone

1. Open your iPhone's camera
2. Tap the Camera app icon
3. Point and focus the camera at the QR code
4. The camera will scan the code.
5. Tap the Safari notification at the top of the screen
6. The QR code content information will appear (webpage, video, picture, etc.)

On your Android

1. Open your Android's Google Play Store. Tap the Google Play Store app icon
2. Tap the search bar at the top of the screen
3. Type in 'qr code reader no ads'. A drop-down menu will appear with search results
4. Tap QR Code Reader - No Ads. It should be at the top of the drop-down menu.
5. Tap INSTALL.
6. Tap ACCEPT. The QR Code Reader application will begin downloading; an icon will be added to use the app without downloading again
7. Tap OPEN to open the QR Code Reader app
8. Point your Android's camera at the QR code. It will focus on the code
9. Once the code scans, you'll see an image of the QR code on the screen, along with the QR code's content listed below the image.
10. Tap the code content to open and view the content (webpage, video, picture, etc.)
